Do Today.™

**It's like living death every day.**

“Imagine waking up every day to debilitating fatigue, unrefreshing sleep, brain fog and dizziness, extreme weight changes, chronic pain and every vital organ in your body failing.”

“Imagine constantly feeling too tired, too weak, too disoriented and in so much pain you can't perform simple day-to-day functions.”

# Integrated Campaigns

**When chronic illness needs a friend there's LiveOn.org**

Crushing diagnoses. Chronic pain. Anxiety. Depression. There are millions of people with all and other great chronic illnesses who struggle to make it through every day. Download the app to connect to people who know your pain and who can help you do today.

*Do Today.*

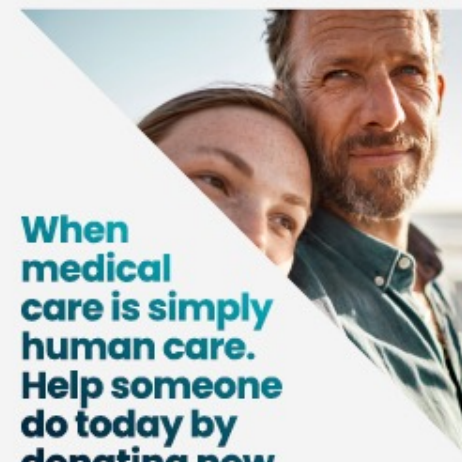

Brand Awareness

**When medical care is simply human care. Help someone do today by donating now.**

### Our mission.

LiveOn.org is a non-profit community established to support the millions of people who suffer from ME and other chronic post-infection diseases, such as long-COVID, POTS, EDS, MCAS, Lyme/MSIDS, among others. These are multisystemic diseases that simultaneously affect the brain, nerves, muscles and most every vital organ—manifesting as chronic pain, inflammation, and fatigue.

Through disease awareness, education, personal stories, and digital connection, we are striving to help chronic disease sufferers, caregivers, and the healthcare community come together to support, to encourage, and to find solutions that shorten the journey to a better quality of life.

Find out how

### Here are the facts...

Over 30 million people worldwide suffer from ME and other chronic post-infection diseases.

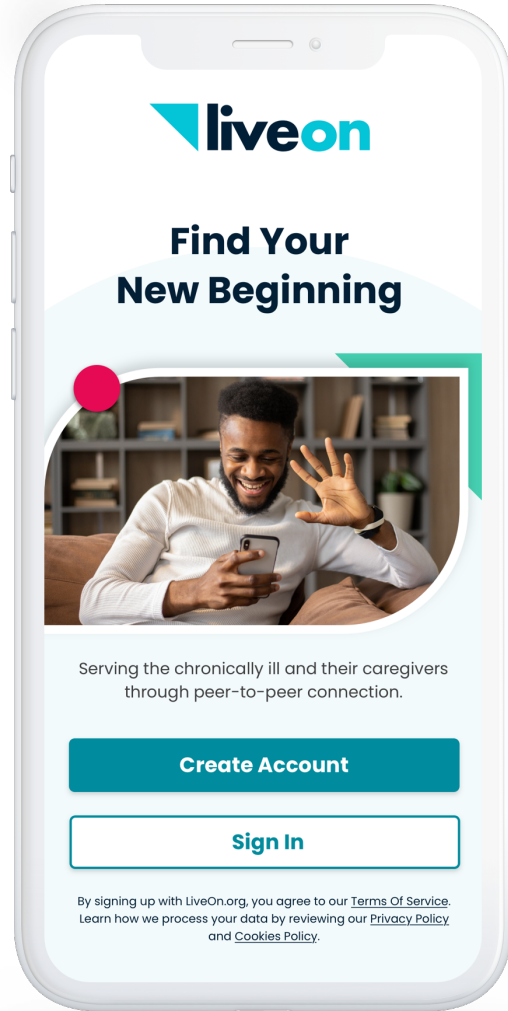

Experts believe the number of sufferers will double over the next few years because of long-COVID.

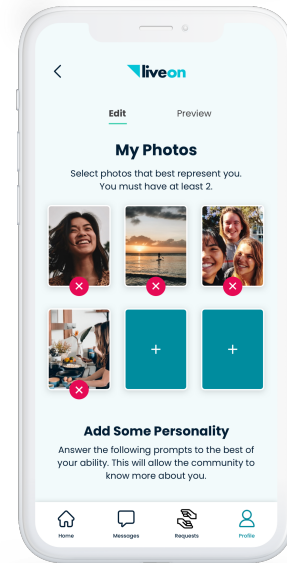

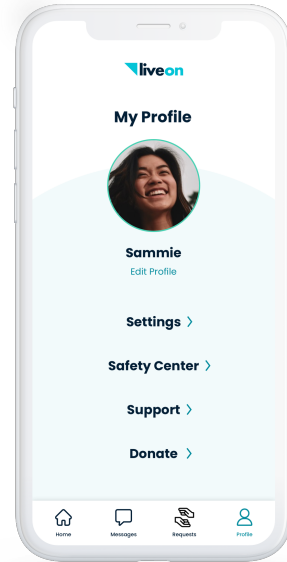

There's currently no proven diagnostic test, no approved treatment, and no cure.
